

CAREER OBJECTIVE

B.Tech Software Engineering student with hands-on Machine Learning experience. Adept at Python programming, data analysis, and technical problem-solving. Seeking to leverage engineering skills in a developer role.

WORK EXPERIENCE

Machine Learning • Internship

Jul 2026 - Present

SkillCraft Technology, Virtual

- Developed a multivariate Linear Regression model using Scikit-Learn to predict housing valuations, achieving an overall model accuracy (R^2 score) of 0.9672.
- Implemented an unsupervised K-Means Clustering algorithm using the Elbow Method to cleanly segment retail consumers into 5 distinct purchasing profiles.
- Engineered a Support Vector Machine (SVM) image classification pipeline with an RBF kernel to process and classify 12,288 flattened color pixel features.
- Simulated a Deep Learning Convolutional Neural Network (CNN) multi-layer grid to recognize structural hand gestures across 400 sample image matrices.

EDUCATION

B.Tech, Software Engineering

2025 - 2029

NxtWave Of Innovation In Advanced Technologies (NIAT College), Jaipur

TRAININGS / CERTIFICATIONS

Walmart USA - Advanced Software Engineering Job Simulation

Jun 2026

Forage, Virtual

Focused on advanced software development principles, utilizing Python and SQL databases to solve simulated enterprise data architecture problems.

Credential ID 78WX26FT74wAGups3

SQL CAST Essentials Workshop For Beginners

Jan 2026

LetsUpgrade, Virtual

Completed core foundational training focusing on type-casting functions and database structural management ID:

LUECDTDEC12522

SQL LIKE Operator Essentials: Advanced Pattern Matching

Jan 2026

LetsUpgrade, Virtual

Mastered complex relational database querying frameworks and pattern matching filters using SQL optimization.

Credential ID LUEPMJAN12631

Electronic Arts - Software Engineering Job Simulation

Jan 2026

Forage, Virtual

Practiced low-level systems execution and production code architecture using C++ and C.

Credential ID rML4JqyKX7KLWHTe3

PROJECTS

[Web-Calculator ↗](#)

Jun 2026 - Jul 2026

- Developed a responsive web interface module as part of the SkillCraft Technology technical evaluation track.
- Optimized structural layouts and styled front-end components using modular web standards to ensure cross-device compatibility.

[AI Text Summarization Application ↗](#)

May 2026 - Jun 2026

- Developed a Natural Language Processing (NLP) application designed to ingest long-form text articles and extract core contextual summaries.
- Programmed text parsing algorithms and optimized data handling workflows to ensure rapid processing times.

[Ninja-Type Application ↗](#)

May 2026 - Jun 2026

- Developed an interactive typing application designed to calculate real-time user metrics like Words Per Minute (WPM) and accuracy percentages.
- Implemented strict string-matching algorithms to track input precision and handle dynamic word generation pipelines.

SKILLS

- | | | |
|----------|-------------------|----------|
| • Python | • C++ Programming | • Java |
| • HTML | • MongoDB | • SQLite |
| • SQL | • C Programming | |

ADDITIONAL DETAILS

- Successfully completed the Codequezt #27 Coding Challenge hosted by Naukri Campus (Issued Jan 2026). Credential ID 697661bdfac35327673e3e98
- Completed the Techquezt #27 Gaming and Tech evaluation track hosted by Naukri Campus (Issued Jan 2026). Credential ID 696cfd467baf842bcc2dbf69
- Successfully completed the Codequezt #27 Coding Challenge hosted by Naukri Campus (Issued Jan 2026). Credential ID 697661bdfac35327673e3e98
